Create your profile and instantly have the ability to share all your details and links with anyone, anywhere.

From 03/2022 To 07/2022  
Backend Developer (Django Rest Framework)

### B2B - Caconex

Carconex is a platform that allows users who play a role as providers connect with other users playing a role as customers. On the one hand, Providers bring a wide variety of services to their customers such as towing, accessory installations and air conditioning. On the other hand, customers who need certain services register an account in the platform and then find providers who provide them their services that they want.

From 06/2022 To 11/2022  
Backend Developer (Django Rest Framework)

### B2B - Autoport

- Help customers can receive smart vehicle reports from the workshop/service center when maintaining or repairing their vehicle. Customers can receive the reports everywhere.
- Help Workshop can send smart vehicle reports to customers for their approval. They also educate customers about their vehicle
